

July 2003 : New website and new range

**NEW WEBSITE AND NEW RANGE @
www.aluminiumshutters.co.uk**

**Classic design, custom made, excellent security,
maintenance free**

Shutters for security, privacy and as an interior or exterior design option are becoming increasingly popular. Following the recent launch of the Classic and Sanctuary range, Eden House announces the launch of the Pavilion range.

In addition to opening and closing like conventional side hinged shutters, the Pavilion shutter also has adjustable horizontal louvres to control privacy and light.

Notes to editors :

The shutters are powder coated. There is a 20 year manufacturer's warranty on the leaves and frame and a 10 year manufacturer's warranty on the paintwork.

Each of the three ranges has horizontal louvered slats. **Classic** : traditional design for privacy. **Sanctuary** : interlocking slats for security. **Pavilion** : slats open and close to control privacy, close tightly for security and each slat is individually sealed to block out light if desired.

Prices range from £250-£290 per square meter plus VAT

Easy to follow guidelines on measuring and ordering are available on the this website and any queries can be discussed by calling 01276 489 679.

The robust construction of the aluminium shutters provides an excellent deterrent against vandalism - ideal for vulnerable windows or doors and properties left unattended for any length of time. Suited to any environment - from exposed external windows to steamy bathrooms, aluminium does not rot or rust, and is inherently maintenance free. In addition to traditional colours like heritage green, white, cream and brown the shutters are available in a wide range of colours including a **choice of three stunning contemporary natural aluminium finishes** - matt, polished and brushed.

The design of the shutters makes them easy to install. They are delivered already set into a frame eliminating the need to align each leaf and all accessories are included.
